New Classic Saddles

We have great pleasure in submitting to your notice our 3 new Classic Saddles.

The B68 is the newest all-rounder for daily city or touring use. Its leather top is the same used on our timeless best seller B66, but while the B66 features double rails and springs, the B68 is a more modern seat featuring a standard single rail. This metal structure allows the B68 to be mounted directly on modern suspended seat posts without the use of a clamp. The saddle is available also in ladies version, named B68 S. Both are sold in black, brown or honey.

Our new Flyer Special enlarges our range of classically sprung saddles for long distance and ATB use. This saddle is a luxury version of the standard Flyer, enriched with hand hammered copper rivets and skived sides. The Flyer Special is available in 3 colours: black, brown and honey. It is available also in ladies version, named Flyer S Special.

The B135 is an absolute novelty. Since decades Brooks had stopped the production of double sprung saddles. The B135 covers this lack in the Brooks range, featuring not only double springs at the back, but also a frontal loop spring for maximum suspension. The saddle is available in the 2 Brooks traditional colours: black and honey.
